

EduCore

ERP and CRM System for Private Schools — system reference

Prepared for: Minguito

Overview

EduCore is an integrated ERP and CRM system for managing school operations, enrollment, billing, faculty, student relationships, and admission inquiries. This document covers the system flow, the 9 core modules, role-based access, and the underlying data model.

Core modules

These 9 modules are the main scope of the system:

1. Student Information Management
2. Enrollment Management
3. Tuition & Billing
4. Faculty Management
5. Class Scheduling
6. Accounting & Expenses
7. Parent/Student CRM
8. Inquiry & Admission Tracking
9. Reports & Analytics

User roles & module access

Each role's access to the 9 core modules:

Admin

- Student Information (Full access)
- Enrollment (Full access)
- Tuition & Billing (Full access)
- Faculty Info (Full access)
- Class Schedule (Full access)
- Accounting (Full access)
- Messages (CRM) (Full access)
- Inquiries (Full access)
- Reports (Sees everything)

Registrar

- Student Information (Full access)
- Enrollment (Full access)
- Class Schedule (Full access)
- Inquiries (Full access)
- Tuition & Billing (View only)
- Messages (CRM) (Can send messages)
- Reports (Enrollment only)

Faculty

- Student Information (Own students only)
- Class Schedule (Own classes only)
- Reports (Own class only)
- Faculty Info (Own profile only)
- Messages (CRM) (Can send)

Finance

- Tuition & Billing (Full access)
- Accounting (Full access)
- Student Information (View only)
- Messages (CRM) (View Only)
- Reports (Money only)

Parent / Student

- Student Information (Own child only)
- Class Schedule (Own child only)
- Enrollment (Can apply)
- Tuition & Billing (View + pay)
- Messages (CRM) (Own messages)
- Inquiries (Can submit)

Main Admin sees and controls everything.

Registrar handles students from inquiry to class assignment, with no money access.

Faculty only sees their own classes and students.

Finance only handles money (billing and expenses).

Parent/Student only sees their own (or their child's) information.

Admin

- Student Information: enters or edits any student's full record (name, birthday, address, guardian info, documents)
- Enrollment: approves or rejects enrollment, sets up the school year
- Tuition & Billing: sets fee amounts, discounts, and payment plans
- Faculty Info: adds or edits teacher records
- Class Schedule: creates sections, assigns rooms and time slots
- Accounting: records income and expenses, sets the budget
- Messages: sends announcements to anyone
- Inquiries: manages and assigns inquiries to staff
- Reports: no input — just views all reports

Registrar

- Student Information: enters a new student's name, birthday, address, guardian info, and uploads documents
- Enrollment: enrolls a student or updates their status
- Class Schedule: assigns a student to a section
- Inquiries: logs a new inquiry and updates its status
- Tuition & Billing: no input — just checks balances
- Messages: sends enrollment-related announcements
- Reports: no input — just views enrollment numbers

Faculty

- Student Information: enters grades, attendance, and remarks for their own students
- Faculty Info: updates their own contact details
- Class Schedule: no input — just views their own schedule
- Messages: sends messages to their students' parents
- Reports: no input — just views their own class results

Finance

- Tuition & Billing: records payments received, applies discounts
- Accounting: logs expenses (like utilities or supplies) and income
- Student Information: no input — just checks grade level for billing
- Messages: no input — just reads billing-related messages
- Reports: no input — just views collection and expense numbers

Parent/Student

- Student Information: no input — just views their child's record
- Enrollment: submits an application and uploads documents
- Tuition & Billing: submits a payment
- Class Schedule: no input — just views their child's schedule
- Messages: sends messages to teachers
- Inquiries: submits an inquiry (before becoming a student)

Here's the full journey, step by step, following one student from first contact to being fully part of the school:

1. Getting noticed

A parent hears about the school and sends an inquiry — asking about grade level, fees, requirements.
(*Parent/Student → Inquiries*)

2. Following up

The Registrar sees the inquiry, contacts the parent, answers questions, and updates the inquiry as "in progress."
(*Registrar → Inquiries*)

3. Applying

The parent decides to enroll their child and submits the application with documents (birth certificate, report card, etc.) (*Parent/Student → Enrollment*)

4. Creating the student record

The Registrar checks the documents and creates the student's official record in the system. (*Registrar → Student Information*)

5. Approving enrollment

The enrollment gets confirmed and the student officially becomes "enrolled." (*Registrar/Admin → Enrollment*)

6. Assigning a class

The Registrar places the student into a section with the right subjects and teacher. (*Registrar → Class Schedule*)

7. Billing

Once enrolled, the system generates the student's fees based on their grade level (fee amounts were already set by Admin at the start of the school year). (*Finance → Tuition & Billing*)

8. Paying

The parent pays the tuition — in full or by installment — through their own portal. (*Parent/Student → Tuition & Billing*)

9. Recording the payment

Finance confirms the payment and updates the student's balance. (*Finance → Tuition & Billing*)

10. Classes begin

Throughout the school year, the teacher records attendance, grades, and remarks for their students. (*Faculty → Student Information*)

11. Staying in touch

Teachers send updates to parents about their child's performance or class announcements. (*Faculty → Messages*)

12. Tracking money

Alongside collecting tuition, Finance also logs the school's expenses — utilities, supplies, salaries. (*Finance → Accounting*)

13. Checking progress

At any point, each role checks what matters to them: Admin sees everything, Registrar sees enrollment numbers, Finance sees money collected, Faculty sees their class's results, and the parent sees their child's record. (*All roles → Reports*)

That's the full loop — from a stranger inquiring, to a fully enrolled student attending classes, paying fees, and everyone tracking their part of it.
